Core Strengths: World-Class Production Capability

Elite Team & Rich Experience

We have a seasoned elite team: our core artists each bring over a decade of industry experience and focus on the full next-gen character pipeline, ensuring top-tier quality for every project.

AI Empowerment & Technological Innovation

Building on this production strength, we deeply integrate AI across the pipeline — from high-poly sculpting and auto-retopology to AI-assisted texturing — further improving both efficiency and detail.

Core Strengths: Elite Team & Rich Experience

A Decade of Craft, the Foundation of Quality

Our core team consists of the industry's leading artists, averaging over ten years of next-gen game art experience. Members have held positions at top-tier domestic and international game studios and contributed to multiple AAA titles, giving us precise command of the aesthetic definition and production standards of high-quality characters, and embedding professional DNA into every project.

End-to-End Control, Assured Delivery

We cover the entire production chain from concept design and structural build to material rendering, offering specialized solutions for tough challenges such as complex creature anatomy, fine cloth simulation and realistic surface rendering. Standardized workflows are strictly enforced so that every detail meets the industry's highest standards and projects land efficiently.

Dedicated to Next-Gen Art, Serving the World's Leading Game Projects

AAA Project Experience

End-to-End Production

Top-Tier Quality Delivery

Core Strengths: AI Empowerment & Technological Innovation

AI Across the Full Pipeline: Redefining Productivity

We believe technology is the core tool for elevating artistic expression, and have embedded AI deeply into every stage of next-gen character production. From high-poly sculpting, auto-retopology and UV unwrapping to AI-generated textures, AI runs throughout the pipeline, providing the technical foundation for artistic creation.

A Dual Leap in Efficiency and Quality

AI has dramatically cut the time spent on repetitive tasks in traditional workflows while pushing the boundaries of detail. We can now deliver projects several times faster without compromising top-tier visual quality — a true win-win for efficiency and artistry.

Where Technology and Aesthetics Coexist.

With AI as our brush, we paint boundless possibilities for next-gen art and keep pushing the frontiers of creation.

Core Strengths: Professional Team

Elite Team

10+ Years

Average industry experience of core artists

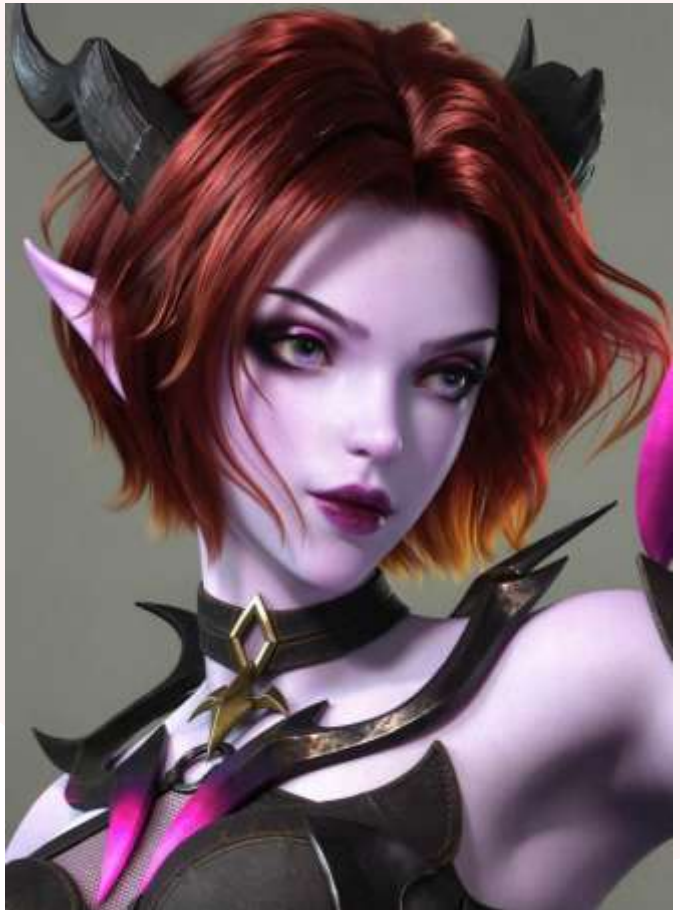
Every core artist brings more than ten years of industry experience focused on next-gen character creation, safeguarding the quality of each project.

Built on talent and lifted by stylistic range, we deliver world-class professional art solutions for every project.

Core Business: Next-Gen Character Models

Next-Gen Character Modeling

We specialize in the end-to-end production of high-quality next-gen character models. From high-precision modeling and PBR material painting to rigging, our team creates top-tier character assets rich in detail and realism — giving games their soul.



Next-Gen Portfolio: High-Precision Creature Models

Next-Gen Portfolio: Stylized & Anime Characters

01. Stylized Character Models

Using Stylized proportions and clean geometric forms that sharpen the character's crisp, contemporary feel, while retaining the structural accuracy and detail of next-gen modeling alongside a cartoon aesthetic.

02. Classic Anime Character Recreation

We faithfully reproduce the costume textures and physical presence of classic anime characters, using next-gen texturing to render materials with subtlety and precisely recapturing each character's aura and spirit — meeting the demanding standards of IP adaptations.

Our Partners

We are proud to have built long-term, stable partnerships with many outstanding game companies and brands.

Deep Roots in China: Partnering with Industry Leaders

Perfect World, Giant Network and Tencent Games

are key partners in China's domestic game market; we take part in the art and technical development of their flagship titles across all genres, jointly creating benchmark works with global influence.

Going Global: Connecting with the World's Best

Ubisoft, Bandai Namco and CD Projekt Red

work closely with world-renowned game studios, providing professional art support and technical solutions for open worlds, sequels to classic IPs and hardcore RPGs, helping build deeply immersive game experiences.

Future Outlook

Market Growth & Financial Goals

Continue to deepen our presence in the game art outsourcing market while vigorously growing our Mini Program development business, becoming the leading enterprise in this field in Southwest China.

Technology Development Strategy

Continuously adopt and develop new art production technologies to improve the efficiency and quality of Mini Program development, creating greater value for our clients.

Diversifying Our Business Ecosystem

Explore more ways to combine game art with Mini Programs, incubate our own IP, and expand into new business models.

Vision: To drive the evolution of content through technology, define industry standards through innovation, and become the world's most trusted digital art service provider.

Thank You

We look forward to joining hands with you to create a new vision for games!
